

## DTMF Shutdown and Reboot for AllStarLink Version 3

### DTMF Shutdown Script

```
; Define the DTMF command that will trigger the shutdown
990 = cmd,/etc/asterisk/local/shutdown_server.sh
```

```
; Define the DTMF command that will trigger the reboot
991 = cmd,/etc/asterisk/local/reboot_server.sh
```

#### ***-Shutdown Script***

```
#!/bin/bash
```

```
# Filename: /usr/local/sbin/shutdown_server.sh
# Purpose: Shuts down the server when triggered by a DTMF command.
# Author: Ham Radio Crusader
```

```
# Log the shutdown action for debugging purposes
echo "$(date): Shutdown command received via DTMF." >> /var/log/allstar/shutdown_command.log
```

```
# Shutdown the system
/sbin/shutdown now
```

---

#### ***-Reboot Script***

```
#!/bin/bash
```

```
# Filename: /usr/local/sbin/reboot_server.sh
# Purpose: Reboots the server when triggered by a DTMF command.
# Author: Ham Radio Crusader
```

```
# Log the reboot action for debugging purposes
echo "$(date): Reboot command received via DTMF." >> /var/log/allstar/reboot_command.log
```

```
# Reboot the system
/sbin/reboot
```
